

What's new in the world of integrations for

Lender*VP

OpenLending Integration is here!

OpenLending provides high quality default insurance to assist credit unions manage risk. Using their native automated decision model, credit unions can expand their risk-based lending policy to say, "YES!", to more borrowers who may have not qualified without OpenLending!

What does the integration include? Credit unions who have an existing relationship with OpenLending can now leverage the ability to submit applications for approval and certification from CU*BASE. All of the applicant and collateral information will be passed to OpenLending for decision and if approved the option to certify without the need to re-key. Applications are worked from start to finish in CU*BASE following credit union policy. If an applicant falls into your credit unions requirements needing additional certification with OpenLending to back the loan, the application can be sent to the vendor.
