# More Than Just a Selling Tool

## Package Loans to be Sold (Tool #574)

Packaging Loans for Sale is more than just a feature credit unions can use when considering if they would like to participate or sell a portion of their loan portfolio; this feature also allows management to segment a portion of their loan portfolio for concentration risk analysis, including viewing servicing income and yield analysis.

The Package Loans for Sale feature is a free brokerage tool. Use it to bundle and sell loans at your credit union. Maybe your goal to have a certain percentage of loans in your portfolio from outside sources. Now you can make money without the need of a middleman.

**Packaging Loans to be Sold (Tool #574)** Use the filters on the entry screen, such as loan-to-value, loan balance, or credit score range to narrow your results. You can even select “small” loan size so your smaller loans are presented at the top of the resulting listing, allowing you to spread out your risk.

Packaging Loans for Sale can also be used as a Risk Management tool. The built in evaluation tools allow you to measure your loan portfolio for risk and yield analysis. No need to run complex queries to evaluate your loan portfolio.
